Objective

Backend-focused Full Stack developer with experience building reliable APIs, payment flows, and role-based systems. Interested in data consistency, secure authentication, and webhook reliability. Aims to work on platforms where integrity, performance, and error handling matter – whether in logistics, fintech, or other data-driven domains.

Education

Bachelor of Science in Computer Science and Engineering

BRAC University, Dhaka, Bangladesh

January 2026

Technical Skills

Languages: Python, JavaScript, TypeScript, PHP, C/C++

Web Development: HTML, CSS, React.js, Express.js, Node.js, Next.js

Databases: Postgresql, MongoDB, Mysql

Tools/IDEs: Git, GitHub, Postman, Firebase, Arduino IDE

Other: OOP, Data Structures, Algorithms

Work Experience

Full Stack Developer (Backend Focus)

January 2026 – Present

SA Khan TradeX, Dhaka, Bangladesh

- Designed RESTful APIs with Node.js/Express.js and optimized MongoDB pipelines, cutting query time by 35%.
- Implemented JWT-based RBAC and parameterized queries to secure endpoints and prevent injection.
- Integrated third-party payment gateway and order processing webhooks with idempotency and error handling.
- Collaborated with frontend team on API contracts and led code reviews focused on backend best practices.

Projects

ZapShift – Role-Based Courier & Parcel Management Platform

Technologies: React, TanStack Query, Firebase Auth, Stripe, Node.js, Express.js, MongoDB, Firebase Admin SDK

- Built role-based dashboards with Stripe Checkout and dynamic delivery charge calculation.
- Designed RESTful APIs for parcel lifecycle, rider approval, and tracking timeline logs in MongoDB.
- Implemented Firebase token verification with admin/rider middleware for route protection.
- Integrated Stripe payment success flow and MongoDB aggregation for delivery analytics.

Jibonjatra – A Community Web App for Local People's Day-to-Day Needs

Technologies: JavaScript, Express.js, React.js, Tailwind, Node.js, MongoDB, Mongoose

- Applied area-based searching for market items, daily commodities, home rent, and services.
- Created a social media platform where people can post about their life and local area updates.
- Integrated secure access and authentication using JWT.
- Implemented review and star rating mechanism for service providers.
